L3HARRIS™
FAST. FORWARD.

Two47 ENTERPRISE NETWORK MANAGER

360° visibility at your fingertips.

Tap into the next-gen network health dashboard that puts you in control, no matter how you build your system or where you're monitoring it from.

Engineered to support your mission, the Two47™ Enterprise Network Manager works with the most common industry standards such as SNMP and can integrate a range of off-the-shelf technologies.

The Two47 Enterprise Network Manager allows you to see your system in new ways and in greater precision with custom visualizations that include integrated maps and system statuses configured to support your mission. Most critically, your system will receive continuous monitoring so you can detect issues before they cause interruptions. Like all Two47 solutions, the Two47 Enterprise Network Manager is...

OPEN
Engineered for interoperability and access, anywhere, any time.

ADAPTABLE
Designed to be configured to your needs and budget.

UNSTOPPABLE
Fortified for unflinching reliability and security.

Open standards for flexible, best-in-breed features:

> Monitor network health across your entire system, detecting issues before they interrupt connectivity

> Accessible through secure web access (VPN) and mobile devices

> Visualize components of your system using integrated maps

> Track network data and analytics to identify trends in your network health
