ACCELERATING INNOVATION IN FLORIDA

A Global Technology Leader

L3Harris Technologies is one of the largest public companies headquartered in Florida. The state is home to a significant number of L3Harris operations, and is the center of the company's R&D activities, which benefit customers in Florida and around the world.

FLORIDA FACTS

L3Harris has spurred technology innovation in Florida since the 1950s, beginning with the development of miniaturized electronic tracking and pulse-code technologies for America's fledgling space program. Today, L3Harris has:

- > Headquarters in Melbourne since 1978
- > 40 Florida locations
- > \$306M annual business with Florida suppliers

L3Harris has key roles on major NASA space programs; provides mission-critical radio systems for the U.S. Central Command, U.S. Special Operations Command and many of the state's first responders; develops payloads for commercial and government satellite constellations; and offers technology and training solutions for a new era of aviation.

The 464,000-square-foot L3Harris Technology Center serves as a hub for engineering innovation. The 23,000-square-foot Global Innovation Center enables visitors to immerse themselves in L3Harris technology through virtual and 3D experiences. In addition, a high bay facility in Palm Bay

manufactures unfurlable mesh reflectors sized from two to 25 meters – the largest on orbit today.

Another key capability in Melbourne is the company's Network Operations and Security Operations centers, which support critical networks for customers across Florida and around the world 24/7/365. The company manages the nationwide network for the Federal Aviation Administration to ensure 87,000 flights a day arrive safely, and over 3,300 sites in Florida provide reliable communications for State agencies and schools. L3Harris also supports the aviation community by training the next generation of commercial pilots and instructors at the L3Harris Florida Airline Academy in Sanford, Florida.

L3Harris operations in Florida deliver a range of advanced electronic capabilities for the F-35 Lightning II aircraft, including cockpit and data communications, avionics, electronic warfare technology, antennas and carriage and release racks. The company has delivered 1 million components to date while significantly cutting costs and maintaining a near perfect on-time delivery record.

FAST. FORWARD.

FLORIDA PROGRAMS

Through its skilled Florida workforce and modern facilities, L3Harris is leading the development of new technologies that are changing the world. Highlights include:

- > Key roles on major NASA programs – Apollo, the Space Shuttle, the International Space Station, the Tracking and Data Relay Satellite System, the James Webb Space Telescope and NOAA weather satellites.
- > Innovative payloads and electronics for commercial and government satellite constellations, including each of the 81 Iridium NEXT satellites – the largest implementation of a commercially-hosted satellite payload.
- > High-performance multiband, multimission tactical radio systems that provide situational awareness for the U.S. Central Command and many others.
- > Public safety and land mobile radio systems used by 20+ Florida counties, including Miami-Dade County, where an L3Harris system provides public safety communications for more than 80 agencies and 32,000 users serving 2.5 million people.
- > World-class instruction, facilities and aircraft that train 1,000 new pilots each year in Florida and other locations around the world.
- > The secure, state-wide MYFLORIDANET-2 communications network infrastructure service that connects public safety, law enforcement, public schools and other state and local government agencies with 24/7/365, highly-reliable, managed services.
- > Military-grade lasers for intelligence, surveillance and reconnaissance and fire control.
- > Technical Representative Services to the U.S. Navy for RF Systems and 45th Space Wing for Range Safety Communication.

MAKING A DIFFERENCE

L3Harris is committed to being a good corporate citizen and enhancing life in the communities where it has operations. The company has:

- > Contributed millions of dollars to community and academic organizations in Florida during the past five years, focusing on STEM education
- > Florida employees have donated hundreds of thousands of hours of time to STEM education, the arts, family assistance, and military and first responder organizations
- > LEED certification from the U.S. Green Building Council for the L3Harris Technology Center and Global Innovation Center
- > Partnered annually with the Orlando Magic to honor thousands of Florida's first responders, active duty soldiers and military veterans at the Amway Center
