

L3HARRIS.COM

A COMMONWEALTH PARTNER FOR 50 YEARS IN VIRGINIA

A Global Technology Leader

L3Harris Technologies has a long and beneficial relationship with Virginia, with several design and manufacturing centers located within the commonwealth and a partnership spanning decades. The products and systems created here benefit customers in Virginia and around the world.

VIRGINIA FACTS

Virginia is home to many L3Harris technology programs that address unique challenges our customers face in extreme operating environments – from under the sea to outer space. The company's presence and impact in the state include:

- > 45 Virginia locations
- > \$233M annual business with Virginia suppliers
- > \$156K annual charitable contributions

In Lynchburg, L3Harris builds cutting-edge Public Safety and Professional Communications (PSPC) systems used by more than two dozen Virginia law enforcement and other first responder agencies at the city, county and state level. These systems are also in use by agencies across the U.S. and around the world.

Other Virginia locations include the L3Harris Undersea Systems Sonar and Command Systems (USS-SCS) in Chesapeake, which has provided advanced Sonar Antisubmarine Warfare systems and Command and Control solutions for many of the world's navies since 1984.

In Norfolk, L3Harris provides electrical/electronic/structural repair, overhaul, installation, maintenance, modernization, testing and integration services to the U.S. Navy, U.S. Coast Guard, Military Sealift Command, commercial vessels and shore sites.

At the company's facility in Herndon, Harris engineers, scientists and mission experts deliver advanced space and intelligence solutions for global situational awareness, space superiority and Earth insights. In Wallops, L3Harris' enterprise ground system provides command and control capabilities and data processing for NOAA's new generation of weather satellites.

Arlington is home to the L3Harris global business development team, which helps drive the growth of the company.

VIRGINIA EMPLOYEES

Virginia Workforce

- > 700+ engineers and scientists
- > \$111K average salary
- > \$224M direct wages

L3HARRIS™
FAST. FORWARD.

VIRGINIA PROGRAMS

Through its experienced professionals and facilities, L3Harris in Virginia is advancing technologies that help save lives. Highlights include:

- > L3Harris public safety and professional communications systems that are in use across the state in 18 counties and five cities and towns, and by four state government agencies, nine federal customers and two utilities.
- > Advanced Antisubmarine Warfare (ASW) systems that play a vital role in protecting the sea lanes of communication. These sonars are designed to detect and counter the quiet threat posed by modern submarines in both near-shore (littoral) and open ocean environments.
- > Shipboard Command and Control systems that integrate sensor, navigation and tactical communications information to provide enhanced situational awareness.
- > Advanced space and intelligence solutions for global situational awareness, space superiority and Earth insights; enterprise ground systems for command, control and data processing for new-generation NOAA weather satellites.
- > In-house Tactical Unmanned Aircraft System (UAS) capabilities, including rapid design and prototyping, system engineering and platform integration, field testing, manufacturing and logistics support; 600-1,000 UAS produced each year.
- > L3Harris operates, monitors and manages the nationwide ADS-B system for the FAA from Herndon, providing hundreds of radio sites across the country to deliver location information to aircraft over an L3Harris-owned infrastructure.

MAKING A DIFFERENCE

L3Harris is committed to being a good corporate citizen and enhancing life in the communities where it has operations. The company:

- > Makes regular contributions to community and academic organizations in Virginia, with a special focus on STEM education
- > Has funded advanced engineering research projects at Virginia Tech and George Mason University
- > Sponsors dozens of outreach events annually focused on STEM education and groups that support the military and first responders
