MY FLORIDA NETWORK (MFN-2)

Powerful and cost-effective statewide communications network

MFN-2 is a private communications network that connects agencies across the state. Exclusively available for eligible users, MFN-2 offers reliability, flexibility and improved network speeds for the citizens of Florida.

DO YOU QUALIFY?

The MFN-2 network is available for Florida city and county agencies, public and private K–12 school systems, public colleges and universities, libraries, first responders and community organizations (non-profit). In partnership with the Florida Department of Management Services (DMS), Division of Telecommunications (DivTel), MFN-2 provides network services to all eligible users.

The solution provides cutting edge security and robust connectivity creating a highly reliable, statewide communication infrastructure.

THE MFN-2 PORTFOLIO OF SERVICES INCLUDES THE FOLLOWING:

> WAN Service

> MAN Service

> Primary Data Center (PDC) Service

> Broadband Service

> Remote Access—Virtual Private Network (VPN) Service

> Cloud Transport Service

> Ancillary Services

ENHANCING THE MY FLORIDA NETWORK EXPERIENCE

MFN-2 is a dedicated network offering high redundancy and multiple service options for more reliable network speeds and flexibility. The network also uses enhanced SLAs for improved customer service. As a result, customers experience better bandwidth for more efficient handling of daily operations and crisis management.

Enhanced, reliable network built for Florida

BENEFITS

> Additional network security, availability and monitoring

> Competitive pricing

> Enhanced Service Level Agreements (SLAs)

> High core availability and additional cable access

> Low latency and high throughput

> Simplified service structure

CONNECTING NETWORKS ACROSS THE STATE OF FLORIDA

FACTS

> Dedicated 24-hour support

> Flat-rate pricing

> Private network

> No contract length, locked-in service agreements or cancellation fees

> Speeds up to 200Gbs

> Redundant gateway routing

Experience That Matters

L3Harris Technologies designs, builds and operates some of the most secure, integrated telecommunications networks and the United States and provides the foundation for MFN-2. L3Harris has migrated tens of thousands of services for key government agencies like the Federal Aviation Administration (FAA) Telecommunications Infrastructure, the backbone for all air traffic management communications across the United States.

L3Harris also hosts the L3Harris trusted Enterprise Network (HTEN), a private and secure solution designed specifically for enterprise that allows hundreds of gigabytes of data, including voice and video, to traverse the network quickly and simultaneously. The HTEN network offers 99.999% availability to customers 24 hours a day, seven days a week.
