

L3HARRIS™
FAST. FORWARD.

EIS SERVICES OFFERED BY L3HARRIS

Enterprise Infrastructure Solutions (EIS)

DATA SERVICES

VPNS, Ethernet, OWS, SONET,
Internet Protocol

VOICE SERVICES

VOIP

COLO HOSTING

Co-Located Hosting Services

WIRELESS SERVICES

SATELLITE SERVICES

Mobile, Fixed Plans

MANAGED SERVICES

Network, Security, Mobility,
Unified Comms

ACCESS MANAGEMENT

SUPPORT SERVICES

Service-Related Equipment, Service-
Related Labor, Cable and Wiring

Enterprise Infrastructure Solutions (EIS) – Services Offered

1. DATA SERVICES

> Virtual Private Network Service (VPNS)

Our VPNS provides secure, reliable transport of agency applications across the high-speed unified multi-service IP-enabled backbone infrastructure.

> Ethernet Transport Service (ETS)

Our ETS allows agencies to interconnect their LANs transparently over the Metro Area Networks (MAN) and the Wide Area Networks (WAN) regardless of the geographical location of their sites. ETS is offered as both a dedicated (private) service or a shared (multiplexed) service.

> Optical Wavelength Service (OWS)

Our OWS provides dedicated broadband, framing-independent transport networks to interconnect their offices in different regions of the United States.

> SONET

Our SONET offering supports a wide range of digital signals with different capacities, and its interworking capability enables seamless communications between devices that support dissimilar protocols such as IP, Frame Relay, and ATM.

> Internet Protocol Service (IPS)

Our IPS supports a wide range of connectivity requirements that enable government users to access the Internet, government-wide intranets, and extranets by interconnecting GFP/SRE with other government networks and the public Internet Service Provider (ISP) networks.

2. VOICE SERVICE

> IP Voice Services (IPVS)

Our IPVS provides voice communications service and telephony features to agencies using VoIP over a managed IP network.

3. COLOCATED HOSTING SERVICE (CHS)

Our CHS provides data center facilities that may be populated by GFP, such as servers, routers and load balancers.

4. WIRELESS SERVICE (MWS)

Our MWS provides a wireless transmission service for mobile devices supporting 2G to 4G LTE.

5. COMMERCIAL SATELLITE COMMUNICATIONS SERVICE

Provides mobile or fixed commercial satellite communications (COMSATCOM) services to include, but not be limited to: satellite bandwidth, satellite service plans, contractor provided earth terminals, radio frequency equipment, satellite phones, interfaces and support services.

> Commercial Mobile Satellite Service (CMSS)

Our CMSS delivers voice, data and Internet services to land-based, maritime, or aeronautical users using one or two-way communications via satellite.

> Commercial Fixed Satellite Service (CFSS)

Our CFSS provides satellite capacity that can be used to deliver communications and applications at a customer-specified throughput between two or more specified end points.

6. MANAGED SERVICES

> Managed Network Service (MNS)

Our MNS enables an agency to obtain design and engineering, implementation, management, and maintenance services for agency networks. MNS provides the necessary technical and operational capabilities that ensure the availability and reliability of agencies' increasingly complex networks.

> Web Conferencing Service (WCS)

Our WCS enhances traditional conferencing by offering the capability to meet, present, and interact with information via a web browser.

> Unified Communications Service (UCS)

Our UCS integrates multiple methods of communication, (e.g., e-mail, faxing, instant messaging, voice and video calling, conferencing that identifies which participant is speaking, mobile communication, and desktop sharing)

in order to allow users to connect, collaborate, and exchange information

> Managed Security Service (MSS)

Our MSS services provide protection of endpoints, email, web, and networks, and include capabilities such as authentication, anti-virus, antimalware/spyware, intrusion detection, and security event management.

> Managed Mobility Service (MMS)

Our MMS helps agencies manage the transition to a more complex mobile computing and communications environment by supporting security, network services, and software and hardware management for mobile handheld devices.

> Audio Conferencing Service (ACS)

Our ACS enables participants to engage in a multi-point audio conference call. The audio connection from the conference participants to the ACS conferencebridge is provided by voice service (IPVS, CSVS) and cellular voice service.

> Video Teleconferencing (VTS)

Our VTS enables participants at different locations to simulate face-to-face meetings and conduct interactive dialogue with instant sharing of various applications and documents.

> Intrusion Prevention Security Service (IPSS)

Our IPSS monitors Internet traffic bound for or originating from the federal government, detects signs of malicious cyber activity, and prevents that traffic from jeopardizing the confidentiality, integrity, availability, and control of Agency networks.

7. ACCESS ARRANGEMENTS (AA)

Our AAs connect the SDP at the agency location to a POP on the contractor's network.

8. SERVICE RELATED EQUIPMENT (SRE)

Our SRE offers networking and security service-related equipment such as switches, routers, PBXs, telephones, servers, security appliances, firewalls, conferencing-related equipment,

Enterprise Infrastructure Solutions (EIS) – Services Offered

microwave systems, free-space optics systems, surveillance systems, sensors, radio-related equipment, VSATs, and wireless devices.

9. SERVICE RELATED LABOR (LABOR)

Our LABOR offers agencies access to a wide range of technical capabilities to provide assistance to implement EIS services.

10. CABLE AND WIRING (CW)

Our CW offers agencies installation services providing any required connectivity using appropriate cabling and wiring, and related trenching, ducting, grounding, and lightning protection systems in accordance with the Task Order requirements and appropriate standards.

> Intrusion Prevention Security Service (IPSS)

Our IPS monitors Internet traffic bound for or originating from the federal government, detects signs of malicious cyber activity, and prevents that traffic from jeopardizing the confidentiality, integrity, availability, and control of Agency networks.

7. ACCESS ARRANGEMENTS (AA)

Our AAs connect the SDP at the agency location to a POP on the contractor's network.

8. SERVICE RELATED EQUIPMENT (SRE)

Our SRE offers networking and security service-related equipment such as switches, routers, PBXs, telephones, servers, security appliances, firewalls, conferencing-related equipment, microwave systems, free-space optics systems, surveillance systems, sensors, radio-related equipment, VSATs, and wireless devices.

9. SERVICE RELATED LABOR (LABOR)

Our LABOR offers agencies access to a wide range of technical capabilities to provide assistance to implement EIS services.

10. CABLE AND WIRING (CW)

Our CW offers agencies installation services providing any required connectivity using appropriate cabling and wiring, and related trenching, ducting, grounding, and lightning protection systems in accordance with the Task Order requirements and appropriate standards.

Non-Export Controlled Information.

L3Harris Technologies is an agile global aerospace and defense technology innovator, delivering end-to-end solutions that meet customers' mission-critical needs. The company provides advanced defense and commercial technologies across air, land, sea, space and cyber domains.
