

ENTERPRISE INFRASTRUCTURE SOLUTIONS (EIS)

Information Technology Services for Federal Government Agencies

Agencies need cost-effective telecommunications and network services for effective acquisition planning and enhanced operations.

WHAT IS EIS?

EIS is the successor to NETWORKX, an Information Technology Services contract vehicle for government agencies. L3Harris Technologies is a leading technology innovator, solving customers' toughest mission-critical challenges by providing solutions that connect, inform and protect, and is the first large system integrator to be a prime contractor on GSA's IT services contracts.

EIS includes mandatory services across 929 Core-Based Statistical Areas (CBSAs) across the United States. The team includes a mix of national, regional and local carriers that provide competitively priced services with physical carrier diversity in all 50 states

and U.S. territories. This allows low-risk transition of voice and data services, tailored enterprise solutions that include scalability, the reuse of Government Furnished Equipment (GFE), and migration to new technologies. L3Harris offers investment and proven people, processes and tools to deliver a wide range of telecommunications and IT infrastructure services with a higher level of customer service and performance than other EIS prime contractors. The team has a proven track record of applying a solid understanding of Agencies' missions to architect enterprise solutions with a government-wide reputation for making a customer's goal an L3Harris goal to guarantee on-time solution delivery.

FEATURES

- > Next generation infrastructure solutions
- > Catalog with multiple services and suppliers
- > Service-related labor
- > Commercial standards and offerings

BENEFITS

- > Better service selection through large portfolio
- > One single procurement instead of many
- > Single provider framework for design, implementation and life cycle management
- > Best procurement value through competition

SERVICE OFFERINGS

EIS offers a wide range of modern IT solutions which can be tailored to meet an Agency's mission requirements. Solution service offerings include:
