BOOSTING INTEROPERABILITY IN SINGAPORE

A Global Technology Leader

For over 20 years in Singapore, L3Harris has demonstrated world-class engineering, manufacturing, research and development pedigree in working with the Singapore government and industry partners to solve complex problems and defend against evolving threats.

SINGAPORE FACTS

The Republic of Singapore is a world-leader in economic dynamism, transparency, financial trade and gross domestic product (GDP) growth and is a beacon to many countries in what they can achieve. In parallel, the Singapore Armed Forces has become a military powerhouse in the region with state-of-the-art equipment that is well integrated, their forces train on a regular basis and there are well-established plans for the future defense of the nation.

In 2017, L3Harris established an in-country corporate office displaying our commitment to the country. Additionally, we demonstrate support through hiring employees that are either Singapore citizens or Permanent Residents. Singapore is our regional hub

for expanding business opportunities throughout Southeast Asia.

L3Harris is proud to have played a role in equipping all branches of the Singapore Armed Forces and has partnered with leading Singapore firms to offer long-term support of our products and capabilities.

L3Harris' capabilities are well suited to support Singapore's needs. From autonomous surface vessels carrying anti-submarine warfare systems, maritime patrol aircraft and secure and resilient communications to complete solutions for onboard surface combatants and next generation robotic explosive ordnance disposal systems.

We look forward to continuing this relationship and are committed to the country for the long term.
