

L3HARRIS™
FAST. FORWARD.

LIFE-CYCLE TRAINING FOR
WESCAM MX™-SERIES
OPERATORS & MAINTAINERS

YOUR TURRET WAS CONFIGURED ESPECIALLY FOR YOU. YOUR TRAINING PROGRAM CAN BE TOO.

L3Harris supports missions with high-caliber, customizable training programs that support peak performance, rapid-fire confidence, situational awareness and trouble-shooting techniques.

BECAUSE THERE IS NOTHING YOU TAKE MORE SERIOUSLY THAN THE SAFETY AND SECURITY OF YOUR TEAM.

Our mission is to ensure you and your team are fully trained and feeling secure: at-the-ready when duty calls.

L3Harris is the leading trainer on the WESCAM MX-Series electro-optical & infrared (EO/IR) portfolio of surveillance and targeting systems for air, land and maritime missions. Because we've designed and engineered it, we know best to train you on it.

SECONDS COUNT. BE FULLY PREPARED.

L3Harris is proud to support the development of WESCAM MX™ operational and maintenance teams with a comprehensive suite of progressive training solutions that ensure crews are always mission-ready, and able to use their WESCAM MX turret to its full extent without second thought.

Whether you are an experienced WESCAM MX operator or maintainer who wants to ensure mastery, or new to a team, learning how to use this essential mission equipment for the first time, L3Harris has a series of training classes designed to teach all there is to know about your specific WESCAM MX turret, down to its exact configuration. Module in nature, L3Harris courses have been designed with varying levels of skill, experience, budget and physical deployment variables in mind. And because we're the OEM, we know WESCAM MX turrets, technologies and capabilities better than anyone else—no one is better qualified to teach and train the user community than L3Harris.

IN-CLASS COURSE SELECTION OVERVIEW

WESCAM MX Product Familiarization

- > Introductory course designed to introduce new users to the WESCAM MX-Series ecosystem
- > Best for those looking for a quick primer in EO/IR operation and WESCAM MX systems
- > Short duration minimizes down time for customers

INTENDED FOR	CONTENT COVERS	CURRICULUM	DURATION	SOLD AS
System Integrators	Basic Operation	Customized	1 Day	Full class:
Engineers	System Capabilities			Purchase all 12 seats
Managers	System Maintenance			
	Integration Requirements			

Operation & Organizational Maintenance Course (O&OM)

- > Comprehensive in-depth training for mission operations and maintenance of WESCAM MX-Series systems
- > Suitable for users wanting to maximize the potential of their system and operators
- > Course design emphasizes real scenarios and operator experiences

INTENDED FOR	CONTENT COVERS	CURRICULUM	DURATION	SOLD AS
Advanced Level System Operators	Mission Planning & Environmental Conditions	Customized if all 6 seats are purchased	3 Day	Full class:
All Levels of System Operators & Maintainers	Sensor selection			Purchase all 6 seats
	Steering modes			Full class:
	Mission logistics			Purchase individual seats
	Basic Maintenance & Troubleshooting			

In-Flight/In-Vehicle

- > Offers same fundamentals of the O&OM course yet customized to the customer's system and platform
- > Students' learning experience occurs on the same aircraft, sensor and interface that they will use on real-life applications
- > Offers the best student engagement rates and hands-on experience in real-life situations

INTENDED FOR	CONTENT COVERS	CURRICULUM	DURATION	SOLD AS
Advanced Level System Operators	Hands-on Training		5 Day	Full class:
All Levels of System Operators & Maintainers	Customized turret and platform			Purchase all 6 seats

IN-CLASS COURSE SELECTION OVERVIEW

Advanced Operator Training

- > Completely customized to the user's needs
- > Course and content is built directly from each customer's use-case history and operator experience
- > For operators wishing to understand advanced optics and effects that may impact their missions and operations
- > Recommended that users have completed an O&OM level course prior

INTENDED FOR	CONTENT COVERS	CURRICULUM	DURATION	SOLD AS
Advanced Level System Operators	Advanced Mission Planning	Customized	Learn at own pace	Computer-based course:
All Levels of System Operators & Maintainers	Sensor selection and optimization			Learn anytime, from anywhere
	Steering modes and transitions			
	Mission logistics			
	Add on in-flight/in-vehicle training			

CLASSROOMS WITHOUT BORDERS

Recognizing that learning outside of a classroom is sometimes a student's only option, L3Harris has created learning solutions for crews requiring alternative learning options.

eLearning Operation & Organizational Maintenance (Module based)

- > Low-cost entry level solution
- > Offers basic system knowledge and maintenance tasks similar to those of an O&OM course
- > Suitable for users who can't commit to a week-long course, or for infrequent operators looking for a quick refresher training option on their own time
- > Portable, accessible from anywhere (web, mobile, PC)

INTENDED FOR	CONTENT COVERS	CURRICULUM	DURATION	SOLD AS
Advanced Level System Operators	Mission Planning	Designed as a non-specific configuration overview	3-5 Days	Full class:
All Levels of System Operators & Maintainers	System set up			Purchase all 6 seats
	Sensor selection			
	Mission logistics			
	Basic Maintenance and Troubleshooting			

Simulation Training

- > Create a fully-immersive and networked simulation environment
- > Eliminate geographical boundaries
- > Enable joint-force training to occur from anywhere in the world
- > Reduce travel and scheduling hurdles

INTENDED FOR	CONTENT COVERS	CURRICULUM	DURATION	SOLD AS
All Levels of System Operators with Ground, Flight, Pilot Simulators	Create and Train for Missions	Customized	Train at own pace	Computer-based course:
All Levels of System Operators & Maintainers	Specific to the tactical and environmental conditions operators face in the real-world			Train anytime, from anywhere

YOU BOUGHT THE BEST. NOW TRAIN WITH THE BEST.

L3HARRIS' INSTRUCTORS ARE MX-SERIES SUBJECT MATTER EXPERTS – USING MODERN EDUCATION TECHNIQUES TO CREATE AN OPTIMAL LEARNING EXPERIENCE THAT LEADS TO UNCOMPROMISED MISSION SUCCESS.

L3Harris retains top-of-industry talent to train, advocate, support and execute WESCAM MX-Series education for our customers. Using multiple learning theories, instructors know how to tap into each student's unique learning drivers: visual, written, action, performance, interactive and more.

Our instructors are also operators who are up-to-date on the changing technologies and product enhancements, so students receive up-to-the-minute training. Training from these high-caliber instructors inspires mission readiness, high performance, increased mission success rates, reduced equipment down time and ultimately, a return on investment.

To learn more about our instructors, classes and training programs that can be created for your unique requirements, please visit: [WESCAM.com/Training](https://www.wescam.com/Training)
