BeOn® Group Communications Services on Android™

**Start BeOn**
1. Select BeOn PTT from the phone’s main display. If prompted, enter your PIN and tap Continue.
2. After entering your password on the Sign In screen, select Save Password to skip this in the future. Tap Sign In.

**Status Area**
The Status Area acts as an on-screen PTT button. It displays the group or user currently selected for the next call when PTT is pressed, as well as the last call transmitted or received. The color of the Status Area indicates the current activity:
- Blue background indicates “Idle” mode (i.e., no active call).
- Yellow background indicates outgoing calls.
- Green background indicates incoming calls.
- Red background indicates distress.

L3Harris is unable to and cannot guarantee either the extent or consistency of the wireless coverage and communications of a cellular commercial carrier's network or other third party network, nor can L3Harris guarantee the quality of the data service provided. Given the dependency on commercial and third party networks, the operation of the BeOn solution, including location information, is not intended for mission critical communications but rather for administrative and other purposes.

Transmit a Group Call
1. Select a call record from the History tab, or select a group from the Groups tab. The selected Group or Contact name always appears in the Status Area.
2. Press PTT and begin speaking. PTT button will vary depending on configuration, but the default PTT is the Status Area. When transmitting, the Status Area is yellow.
3. When finished, release PTT.

Receive a Group Call
During an incoming group call, the Status Area is green and displays the Caller ID. After the talk spurt ends, the History is updated. The Status Area is cleared after approximately two seconds.

Receive an Individual Call
During an incoming individual call, the Status Area is green and displays the Caller ID, and/or VIDA ID, depending on what information is currently available.

Ignore Calls
Ignore incoming group and individual calls by tapping .

Transmit a Group Call
1. Select a call record from the History tab, or select a group from the Groups tab. The selected Group or Contact name always appears in the Status Area.
2. Press PTT and begin speaking. PTT button will vary depending on configuration, but the default PTT is the Status Area. When transmitting, the Status Area is yellow.
3. When finished, release PTT.

Send Text Message to an Individual
1. From the Contacts tab or the Group Members screen, tap and hold on the desired Contact or Group. Tap Send Text.
2. Enter a message, up to 214 characters, and tap Send Text.

Send Text Message to a Group
1. From the Groups menu, tap and hold anywhere on a group now open to reveal the group menu context. Tap Send Group Text.
2. Enter a message, up to 214 characters.
3. Tap Send Text.

Receive a Message
1. appearing twice in the top of the display indicates unscored BeOn notifications; i.e., text messages, distresses, etc.. Tap Send Message and state the priority of the notification.
2. Select the “Unread BeOn Notifications” option under Notifications.
3. Tap  to read the text message.

Presence
User and group presence services support the transmission of the status of users and groups to interested users. Presence information requests can be submitted by the subscriber unit once or tracked in real-time.

Transmit an Individual Call
1. Select the Contact from the History tab or select the Contacts tab in the Groups tab. Tap a contact from the list to make it the next call.
2. Press PTT to initiate the call.

Direct Dialing a Contact
1. Press the phone’s menu button.
2. Tap Individual Call.
3. Enter the User ID and WACN and tap OK.
4. Tap PTT to initiate the call. If the dialed number is in the Contact list, the dialed is displayed.

Receive a Text Message
2. Enter a message, up to 214 characters, and tap Send Text.

Receive a Message
1. From the Groups menu, tap and hold anywhere on a group now open to reveal the group menu context. Tap Send Group Text.
2. Enter a message, up to 214 characters.
3. Tap Send Text.

Receive a Text Message
1. appearing twice in the top of the display indicates unscored BeOn notifications; i.e., text messages, distresses, etc.. Tap Send Message and state the priority of the notification.
2. Select the “Unread BeOn Notifications” option under Notifications.
3. Tap  to read the text message.

Enable Scanning
When scanning is enabled, all groups in the current active profile will be monitored by the BeOn application.

Initiate Distress
1. Press .
2. Confirm the distress at the prompt. The distress is initiated on the distress group which may be different than your currently selected group.
3. The left side of the Status Area is red during a distress, and the entire Status Area appears red when distress calls are received or placed. If the selected feature is enabled, automatic PTT occurs for a configurable length of time following the initiation of a distress on a group. Pressing PTT during this time interrupts the auto-key timer. Depending on the distress behavior defined by the system administrator, you may not be able to change the next call, profile, or scanning until the distress is cleared.

Clear Distress
Only a supervisor can clear a distress for a group. Non-supervisors can only clear a distress for themselves.
1. Tap the distress indication in the Status Area of the display.
2. Tap Cancel Distress to clear either the distress for yourself and/or for the group in distress (if you have supervisor privileges). If you are not a supervisor, you can only clear the distress for yourself.

Disable Scanning
When the scanning feature is disabled, only the selected group will be monitored by the BeOn application.
