P25 PORTABLE AND MOBILE RADIO

Mission-Critical Communications

MORE WAYS, MORE PLACES TO CONNECT

On the frontlines of an emergency, the ability for First Responders to communicate with teammates and partners on a reliable, secure network is important. That's why we developed the industry's first converged Land Mobile Radios (LMR) with LTE. We've also expanded our P25 portfolio to include a range of capabilities providing more ways to keep you connected.

Secure. Reliable. Proven Interoperability.

These are the hallmarks of L3Harris P25 portables and mobiles. Open standards-based and software-defined, our solutions give you more choices of networks, proven interoperability and a flexible migration path to P25 and broadband. They are future-ready investments, with capabilities that keep pace with your agency's changing needs and tightening budgets.

> XL FAMILY of converged LTE LMR portables

> Intrinsically safe configurations for operations in hazardous environments

> Multimode, digital, analog and P25 Phase 1 and 2 capabilities

L3Harris is dedicated to strong collaborations with Public Safety agencies and utilities around the world. These insights fuel our mission to develop the best P25 solutions available.

Our attention to detail can be felt and heard on each of our radios. L3Harris P25 solutions provide loud and clear audio—free from distortion even in noisy environments.

Ruggedized for top performance in harsh environments, our compact, lightweight solutions are ergonomically designed

for gloved-hand operation. Simplified user interfaces make navigation and fast switching to priority talk groups easier.

> Rugged construction to meet intrinsically safe and multiple MIL-SPEC standards for immersion and flammability

> Industry-leading options for advanced connectivity through LTE, Bluetooth®, Wi-Fi®, GPS and BeOn®

> Loud, clear audio pierces through noisy environments

> Compact, lightweight with long-life battery

> Multiple encryption options to keep communications secure

CONVERGED LTE
LAND MOBILE RADIOS

Trust When it Matters Most

The powerful and rugged L3Harris XL FAMILY of portables merges crystal clear audio with voice and data over nationwide broadband networks to improve Situational Awareness. The XL FAMILY also includes configurations meeting Underwriter Laboratories' (UL) Class 1, Division 1 (C1D1) certification for intrinsically safe operations in potentially explosive environments.

SINGLE-BAND PORTABLE RADIOS

Tough Streets. Tough Radios.

Our single-band portables deliver clear, distortion free audio and proven interoperability. They're equipped with Man Down and Lone Worker technologies to help enhance worker safety. Communications are secured through single and multi-key AES/DES encryption.

VIDA® CORE AND BeOn®

Connectivity is at the core of everything we do. We leverage our expertise in communications technologies for the strongest military in the world to develop advanced solutions for First Responders. From our powerful VIDA Core network and BeOn Push-To-Talk mobile application, to our converged LTE LMR solutions, we're dedicated to delivering not just the first, but the best products available today.

> Maintained First Responder connectivity in Florida, Texas and Puerto Rico during a decade of hurricanes, including Harvey, Irma and Maria

> Successfully deployed more than 500 trunked radio systems throughout U.S. and Canada

> Engineered wide-area and multi-state LMR systems for some of the nation's largest commercial companies
