MODERNIZING TAIWAN TO MEET TOMORROW'S CHALLENGES

A Global Technology Leader

The United States is a key partner of Taiwan and works together to ensure strength and stability in the region. In turn, L3Harris supports the U.S. in their efforts to sustain and modernize Taiwan's defense systems.

TAIWAN FACTS

- > In Taiwan since 2011
- > Corporate headquarters in Taipei

Taiwan has started acquiring main battle tanks (M1A2), fighter aircraft (F-16 Block 70), Advanced Jet Trainer (AJT), surface combatants (frigates and corvettes) and new diesel electric submarines. Some of these programs have been developed indigenously along with the help of international partners, a move deemed necessary to ensure long-term supportability of their weapon systems.

L3Harris' capabilities are aligned with the current and future needs of Taiwan, whether it includes upgrading the Taiwan Air Force C-130H fleet, modernizing the avionics package for a helicopter fleet,

modernizing electronic warfare technology on F-16s or maintaining reliable and secure communications throughout the island. As with our commitment to all customers, working collaboratively with local industry is essential to our business. Not only in the design and development, but also in the manufacturing right through to supporting systems locally.
