

WESCAM MX™-MISSION TRAINER

Advanced Simulation and Training Solution for WESCAM MX™-Series EO/IR Surveillance and Targeting Systems

The WESCAM MX-Mission Trainer console provides operators with comprehensive, high fidelity and cost-effective system training without occupying a flight asset. Designed to match your moving map sensor control system and your specific sensor configuration, the WESCAM MX-Mission Trainer provides realistic equipment and mission training experience where operators can rehearse tactics and operation in a representative mission environment.

EQUIPMENT TRAINING:

Full training with the use of authentic mission system / moving map software mated to a high-fidelity operational and behavioral simulation of a WESCAM MX™-Series EO/IR sensor. Allows the operator to train on a simulated platform prior to live operations.

Train regardless of weather conditions, equipment or supporting personnel availability.

MISSION TRAINING:

With the inclusion of WESCAM MX™-SIM capability, build custom mission scenarios that incorporate:

- > **Terrain** – Custom geo-specific terrain profiles
- > **Objects** – Thousands of models included, with the ability to add new specific models

- > **Pattern of Life** – Add pedestrian and vehicle traffic for realistic simulated missions

FEATURES:

- Fully integrated moving map, sensor simulation and mission simulation
- Ruggedized 19" rack-mount Pelican™ case
- WESCAM MX-SIM PC
- Console / moving map PC
- Rack-mounted touch-screen monitor
- Compatibility with any standard WESCAM MX-Series operator interface

INDUSTRY-LEADING TRAINING TECHNOLOGY

Fully customizable to meet integration requirements

- > Fully integrated moving map, sensor simulation and mission simulation
- > Ruggedized 19" rack-mount Pelican™ case
- > WESCAM MX-SIM PC
- > Console / moving map PC
- > Rack-mounted touch-screen monitor
- > Compatibility with any standard WESCAM MX-Series operator interface

WESCAM MX-Pilot Station

BECOME A FORCE MULTIPLIER

At L3Harris, we recognize the importance of quality training when it comes to ensuring successful missions.

From system familiarization to operations and intermediate maintenance, having the right training available when and where you need it is a vital step in mission readiness.

Our training solutions are designed and facilitated by certified professional instructors and instructional designers. This ensures operators and maintainers are armed with all the knowledge and skills required to fully integrate, operate and maintain WESCAM MX-Series EO/IR imaging systems.

Attend a course at one of our factory locations or let us bring the training to your facility.
