REACT IN REAL TIME.

MISSIONOPS™ Tactical Network
Management Suite

A REVOLUTION IN NETWORK AND SPECTRUM MANAGEMENT

Tactical C4ISR networks are typically managed by combining disparate software solutions, leading to a complex system and added burden for the end user. **The MISSIONOPS™ Tactical Network Management Suite unifies core network management functions—delivering them in a single pane of glass—making it fast and easy to set up and maintain resilient communication networks.**
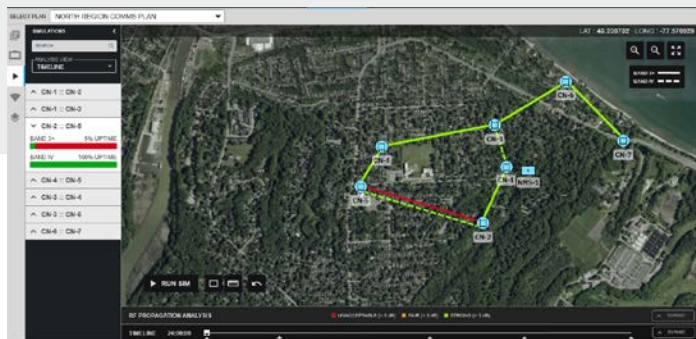

MISSIONOPS™ **PLAN**

Quickly initialize communication assets to establish a resilient network.

MISSIONOPS™ **MONITOR**

Keep informed of network health and availability in real-time.

MISSIONOPS™
TACTICAL NETWORK
MANAGEMENT
SUITE

PLAN

MONITOR

SIM

MANAGE

Stay connected with a fully analyzed PACE plan prior to deployment.

MISSIONOPS™ **SIM**

React to changing mission parameters with remote configuration capabilities.

MISSIONOPS™ **MANAGE**

MISSIONOPS™ **is optimized for a multi-domain cloud environment, but also deployable on a laptop, desktop or server.**

THE **MISSION**OPS™ SUITE IN ACTION:

MISSIONOPS™ **PLAN** +
MISSIONOPS™ **SIM**

Enable instant map-based planning and simulation.

Course of action planning and simulation of mission operational scenarios to predict network availability. Future upgrades including AI-driven planning and simulation, along with enhanced spectrum management operations features.
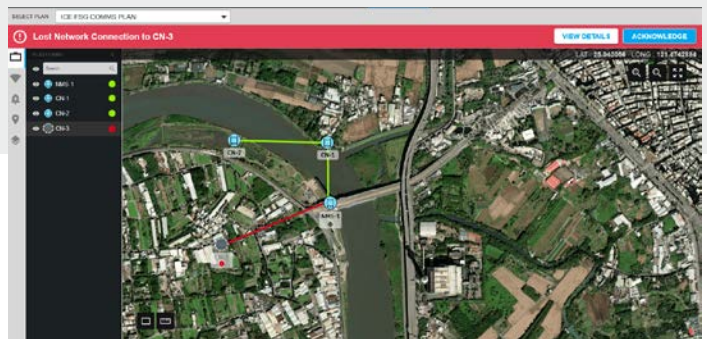

MISSIONOPS™ **MONITOR** +
MISSIONOPS™ **MANAGE**

Get real-time insights into network health.

Network-connected radios, devices and services are visible on a system status dashboard, surfacing actionable insights that enhance C2.

> Dynamic RF propagation and path profiling simulation

> Agile tactical network and RF systems planning

> Embedded radio/ antenna parameters

> Detailed network and device status monitoring

> Multiple monitoring views, including map-based

> Monitoring alerts

> Remote configuration

FAST. FORWARD.

TACTICAL NETWORK + BATTLE MANAGEMENT

Further enhance your C4ISR solution with the future **MISSION**OPS™ Tactical Network Management add-on for your hC2™ Software Suite battle management system.

Display real-time tactical network and electromagnetic spectrum monitoring information. Generate a recognized communications and information systems view to refine your common operational picture.

> Add-on for C4 battle management systems

> Near real-time display

> Comms and info systems views
