

## Command – Control – Collaborate

DragonForce is a team collaboration platform that provides shared situational awareness and command and control capabilities with a set of powerful yet easy-to-use tools.

From the ordinary to the extraordinary, DragonForce empowers agencies to coordinate operations more quickly, safely and effectively. From day-to-day activities to large-scale events, users can access the mission intelligence they need to Observe, Orient, Decide and Act.

DragonForce deploys on smartphones, tablets, and web browsers you already use, turning them into a mission-critical collaboration system.

DragonForce supports small, specialized teams to large national organizations with interoperable communication across the enterprise.

**PUTTING USER LOCATION INTO A SOPHISTICATED COMMAND AND CONTROL APPLICATION HELPS RESPONDERS SOLVE INCIDENTS QUICKLY.**

## Situational Awareness with User Location

DragonForce now connects to StatusAware™

L3Harris has partnered with Drakontas to integrate critical user location information into the DragonForce application. By connecting to the StatusAware application within your VIDA® network, any location updates from field users will automatically push into DragonForce maps, giving commanders a complete operational picture for each incident. Combined with the Command and Control capabilities of DragonForce, commanders get better Situational Awareness.

# FACT SHEET

## Track the location of all your assets in a unified Common Operating Picture

The StatusAware application within your VIDA network displays your team's real-time location on the DragonForce map along with your agency's AVL tracking data and GIS layer datasets, giving you a unified view of all your location data.

## Tactical Whiteboarding

DragonForce turns any map, image, or floor plan into a collaborative whiteboard where users can place icons and make drawing annotations. This "Digital Chessboard" experience allows you to develop and communicate your tactical response plan based on your team's live location and status updates.

## Secure Messaging and File Sharing

Send messages, images, documents and situation reports to individuals or entire groups quickly and securely.

## Customizable Forms

Replace your paper forms with fully customizable digital forms and situation reports and turn your mobile devices into powerful data collection tools. Add any data collection fields, including automatic time and location stamping of record entries.

## Video Streaming

Stream video to the DragonForce command center console and mobile clients from IP video cameras.

## User Status Dashboards & Mass Notifications

With a simple swipe-down selection, users set their operational status for display on the command center dashboard. Offline users are informed of call-out situations through mass SMS notifications.

## Highly Scalable

Organize your DragonForce users into departments and sub-departments to match the organizational structure of your agency, city or region.

Create an unlimited number of concurrent incidents by drawing personnel and data assets from any department.

## One Tool Many Missions

DragonForce equips your team with collaborative tools and information to quickly, safely and effectively respond to any situation. The application smoothly integrates with the L3Harris VIDA core to capture and display real-time location data on its "digital chessboard" command center maps.

### Key Features

- Personnel Tracking
- PTT Integration
- Secure Messaging
- File Sharing
- Digital Forms
- Tactical Whiteboarding
- User Status
- Mass Notifications
- After-action Reports

### Flexible Deployment

- DragonForce deploys on the smartphones, tablets, and computer browsers you already use
- Android
  - iOS
  - Chrome
  - Edge
  - Firefox

### All Phase Utility

- DragonForce provides utility at every phase of any operation
- Planning
  - Training
  - Execution
  - After-action Reporting

The Mission Critical Alliance is a partner program for best-of-breed technology solution providers to openly collaborate to advance the capabilities, compatibility and security of mission critical solutions.
