MODERNIZING TAIWAN TO MEET TOMORROW'S CHALLENGES

A Global Technology Leader

The United States is Taiwan's key ally and L3Harris is a vital partner to both countries in their efforts to sustain and modernize defense systems. L3Harris' presence in Taiwan spans all branches of the Armed Forces.

TAIWAN FACTS

- > In Taiwan since 2011
- > Corporate headquarters in Taipei

To ensure Taiwan's continued independence, the country has begun accelerating the acquisition of main battle tanks (M1A2), fighter aircraft (F-16 Block 70), Advanced Jet Trainer (AJT), surface combatants (Tuo Chiang Corvettes) and new diesel electric submarines. Some of these programs have been developed indigenously along with the help of international partners, a move deemed necessary to ensure long-term supportability of their weapon systems.

L3Harris is proud to have played a role in virtually all of Taiwan's military platforms. Our capabilities are aligned with the current and future needs of Taiwan, whether it includes upgrading the Taiwan Air Force C-130H fleet, modernizing the avionics package for a helicopter fleet, modernizing electronic warfare technology on F-16s, ensuring pilots are trained on the latest state-of-the-art simulators or maintaining reliable and secure communications throughout the country.

As with our commitment to all nations, working collaboratively with local industry is essential to our business. Not only in the design and development, but also in the manufacturing right through to supporting systems in-country.

SOLUTIONS FOR TAIWAN
