“

When you talk about resiliency and redundancy, our technological investments are focused on assuring communications for the network, so you can lose a control site and other sites can take over that role. That, in itself, is a solution you need in Florida, given its nature as a hot bed of hurricane targets.

STEVE WILLIAMS, L3HARRIS SLERS DIRECTOR

”

Over the last two decades, the State of Florida and L3Harris Technologies have worked together to ensure the effectiveness of communications, not only for First Responders, but also the citizens they serve.

# UNRIVALED NETWORK CAPABILITIES

L3Harris is dedicated to continuous innovation ensuring SLERS agencies stay connected through the industry's latest LMR, broadband, geolocation, Mission Critical Push-to-Talk (MCPTT) and Wi-Fi® technologies.

Added to those advanced capabilities are foundational benefits critical to operational success.

## STAY CONNECTED

Leverage LMR, LTE, and Wi-Fi to enhance your communication footprint, or turn your smartphone, tablet, or PC into an encrypted push-to-talk (PTT) communications device using our BeOn® solution.

L3Harris BeOn Mobile Application extends your LMR network to approved devices delivering secure, PTT communications to teams within or beyond your regional network.

## FUTURE READY

The fully virtualized core keeps your system future ready and supports painless updates and system expansion while maintaining your system's compatibility with future technologies. VIDA's flexible design supports adding applications to your system during installation or later, as needs change.

## OPERATIONAL AWARENESS

Real-time tracking of personnel, vehicles and other mobile assets delivers a clear view of your resources. Our situational awareness solutions help you drive faster response times, increasing efficiency and enhancing the safety of everyone.

## GREATER CHOICE

We partner with the best in the industry to give you more control of your system with more technology options to fit your unique needs.

Through the Mission Critical Alliance, L3Harris works with proven vendors to create fully customized solutions for uncompromised radio communications.

# INNOVATIVE PRODUCTS

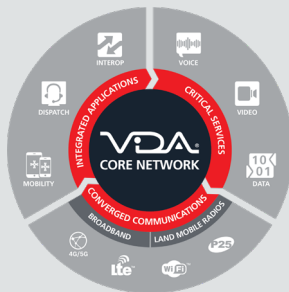

## XL Series of Portables and Mobiles

- > Adhere to P25 standards for LMR interoperability for multi-agency response
- > GPS and Bluetooth standard with options for Wi-Fi, LTE and FirstNet Ready™ capabilities
- > MIL-STD ruggedized with end-to-end voice and data encryption
- > Loud, clear audio with advanced noise cancellation

## BeOn® Mobile Application

- > Secure, affordable extension of your LMR network
- > PTT application for smartphones, tablets and PCs
- > Connects teams anywhere Wi-Fi and commercial LTE are available, regardless of cellular provider
- > Full AES end-to-end voice and data security

## VIDA® Network Solutions

- > Field-proven availability and resilience
- > Streamlined management and control of voice and data
- > Foundational cybersecurity controls
- > Engineered with a tiered architecture and industry-leading redundancy

## SECURE, REAL-TIME INTELLIGENCE POWERS RAPID, RIGHT RESPONSE

## ON-GOING STATE-WIDE SUPPORT

L3Harris has an extensive partner network throughout Florida. Each of our partners is dedicated to providing robust and reliable communications solutions along with continuous customer service and support.

### LONG-STANDING FLORIDA PARTNERS

**Williams Communications**, established in 1959, employs more than 50 technologists throughout the state.

**Communications International**, with a history spanning four decades, employs nearly 200 residents throughout Florida and the Southeastern United States.

**Cooper General**, established in 1978, a certified minority-owned business that employs 35 engineers and radio technicians providing service to the South Florida region.

# DID YOU KNOW?

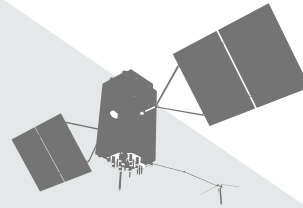

L3Harris is the largest defense and aerospace company headquartered in Florida and the leading provider of these technologies in use every day by forces around the world. Our Public Safety and Professional Communications solutions build on those same time-tested technologies, giving First Responders the tools they need to ensure the safety of communities they serve.

Aerojet Rocketdyne provides a **full range of propulsion and power systems** for rockets, spacecraft and other space vehicles; strategic missiles; missile defense; and tactical systems and armaments

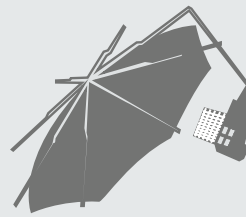

L3Harris is a leader for open systems processing on tactical aircraft and has delivered more than **1 million components for the F-35**

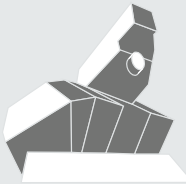

L3Harris navigation technology is on every U.S. GPS satellite with **800 years failure-free on-orbit operations**

Over **8,500 employees** and **1,000 suppliers** call Florida home

With nearly **100 unfurlable mesh reflectors** in orbit, L3Harris is the world leader in deployable mesh reflectors

Pioneered the high-energy beam director for **every major U.S. Directed Energy system**

**More than 1 million hours** of helicopter simulation training provided to the U.S. Army's Flight School XXI program

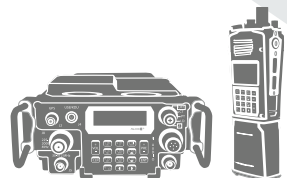

Developed the WESCAM MX Series sensors which are the "eyes" of **over 360 different types of platforms across the air, land and sea domains**

Delivered more than **300 autonomous unmanned undersea vehicles (UUVs)** to our customers, expanding the reach and mission capability of remotely operated vehicles

L3Harris employs **over 20,000 scientists and engineers in more than 350 locations**

**More than 1 million tactical radios** delivered to military personnel around the world

Battle-tested solutions, from **tactical and network communications to next-generation night vision system**

L3Harris has been **awarded over 3,000 patents**
