

SKYRAIDER II: LEAN, AGILE, HARDENED

L3Harris Delivers OA-1K Skyraider II

MISSION NEED

L3Harris has delivered U.S. Air Force Special Operations Command's (AFSOC) OA-1K Skyraider II, a new cost-effective, crewed aircraft to support geographically isolated Special Operations personnel in austere locations. The Skyraider II provides special operations forces (SOF) with the ability to tailor effects to support the joint force in various missions. The Skyraider II delivers close air support, precision strike, and armed intelligence, surveillance, and reconnaissance (ISR) capability.

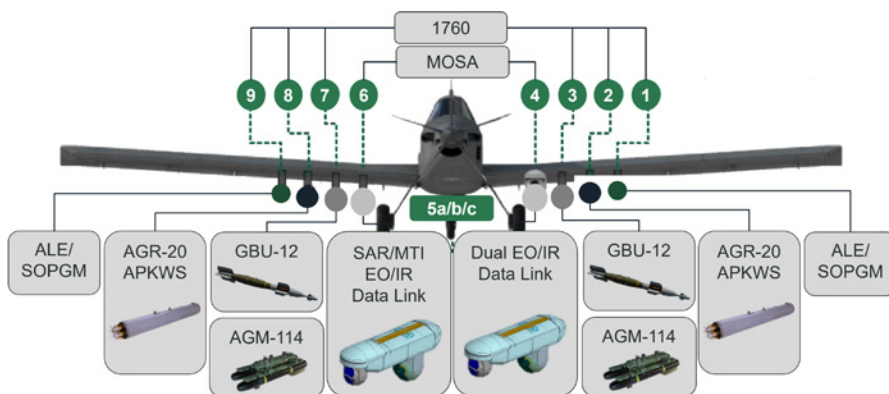

SOLUTION

The Skyraider II aircraft is built on L3Harris' Sky Warden platform and integrated with a mission set unique to AFSOC's requirements. The Sky Warden can be disassembled in under six hours and combat ready within 12 hours allowing rapid transport for crisis response and other novel mission sets. Ground personnel in remote locations can get the support they need at a fraction of the price and logistical footprint using a more cost-effective platform. Whereas jet aircraft are often required to leave the battle area for refueling, the Sky Warden provides continuous armed overwatch support for up to eight hours.

The Sky Warden's unique modular design allows rapid integration of different sensors, communications equipment and combat payloads. The Sky Warden can operate independently or as part of an integrated ISR strike network and has the command and control, power, connectivity and lethality to replace "the stack" and execute the kill chain.

The Sky Warden is not only for counter extremist activities for U.S. Special Operations Command but is also the ideal platform for partner nations and allies looking for self-defense and rapid response capabilities in emerging hot spots or natural disasters in austere locations.

ADAPTIVE AIRCRAFT COMBAT LOADOUT

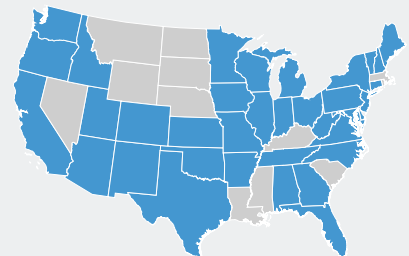

BENEFITS

- > Aircraft with up to eight hours of persistent ISR (loiter)
- > Over 6000 lbs. of external load to find, fix and finish enemy targets
- > Rapidly deployable (removable wings) for transport
- > Built for austere environments
- > Cost-effective solution

SKYRAIDER II EMPOWERING JOBS

L3Harris' nationwide footprint, shown in the map below, reflects the company's critical support for Skyraider II through its suppliers and support hubs.
