

EASY ACCESS TO SYSTEM INTEGRATION (EASI)

Sync in Seconds

L3Harris makes Link 16 “EASI” for new users, field operators and warfighters operating at the tactical edge.

PRODUCT DESCRIPTION

EASI is a lightweight Link 16 network entry and display tool, specifically designed for novice Link 16 users and mobile/small form factor applications. EASI reduces operator inputs needed to join a Link 16 network by 50% compared to previous generation front panel applications. Optimized screen space maximizes operator situational awareness of radio functions without sacrificing features.

The screenshot shows the 'Network Setup and Entry' interface. At the top, there are three tabs: 'Home', 'Network Setup and Entry' (selected), and 'Network Ready'. Below the tabs, there are three progress indicators: 'Setup' (checked), 'Channels', and 'Additional Settings'. The 'Setup' section is active and contains several fields: 'Radio IP Address' (127.0.0.1), 'Port Number' (50010), 'Link 16 Load File' (EASI_Test_Init), 'STN (JU)' (111), 'Time Source' (Host), and 'Time (UTC)' (19:10:42). A 'Radio Connected' status indicator is shown at the top left of the setup section. An 'EDIT' button is next to the Port Number field. A 'Next' button with a right arrow is at the bottom right.

EASI Network Setup

Enhancing Situational Awareness

KEY FEATURES

- > Designed to help novice Link 16 users:
 - Terminal setup
 - Network entry
 - Terminal troubleshooting
 - Advanced waveform configuration
 - CMI (crypto configuration)
- > Supported terminal types:
 - BATS-D (PRC-161)
 - STT (KOR-24)
- > BATS-D front panel display
 - Radio health at a glance
 - Network status
 - Reset IPF/NAV on the move

SPECIFICATIONS

Operating System(s)

- > Android 8+
- > WINDOWS 7/8/10/11

Supported Terminal Types

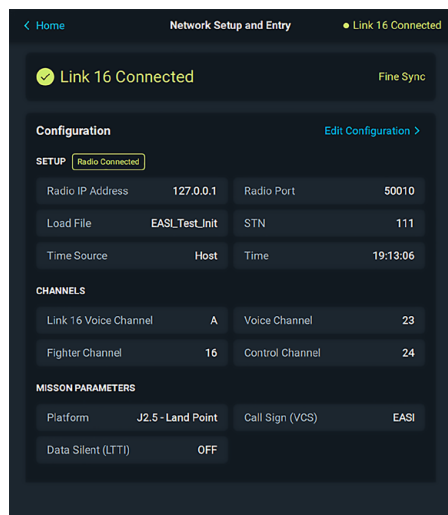

- > BATS-D (PRC-161)
- > STT (KOR-24A)

Supported Connections

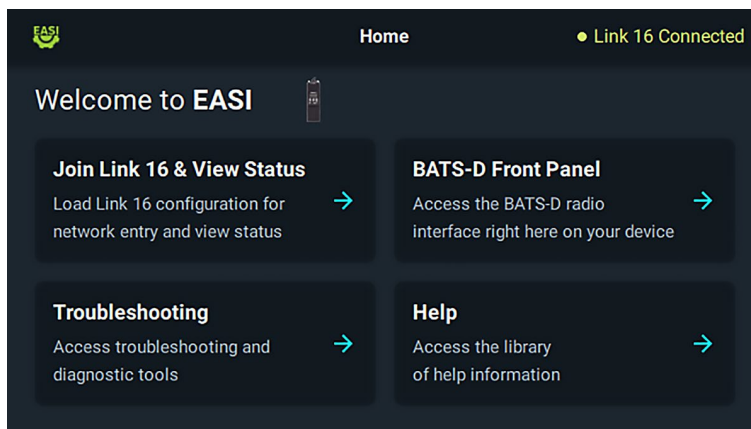

- > Ethernet
- > USB

Crypto-Mod Compliant

- > Advanced crypto management and configuration capable
