Cyber Benchmark: Vulnerability Assessment and Prioritization

Proactively Protect Mission-Critical Networks

Public safety agencies operate in a uniquely high-risk environment, facing threats like targeted ransomware and insider vulnerabilities. A single gap in cybersecurity could disrupt LMR and LTE Mission Critical services, expose sensitive data and jeopardize community safety. Cyber Benchmark is engineered to uncover these risks through deep forensics and real network data, empowering you to protect what matters most.

Why Cyber Benchmark?

DATA-DRIVEN INSIGHTS

Insights that go beyond generic risk models by leveraging actual network traffic analysis and expert forensic review to identify vulnerabilities specific to your operations.

EASY, NON-INTRUSIVE SETUP

Our agentless device installs in minutes, capturing raw data with zero disruption to your daily activities.

COMPREHENSIVE AND ACTIONABLE

You'll receive detailed deliverables and a tailored roadmap to strengthen your network security while aligning with industry standards.

Key Benefits:

- **Minimize Downtime:** Proactively address risks to prevent service disruptions during critical incidents.
- **Protect Community Trust:** Demonstrate a strong commitment to public safety with robust cybersecurity.
- **Ensure Service Continuity:** Maintain uninterrupted emergency communications for those who need it most.

What You'll Receive

Here's what you'll receive to strengthen your network security and stay ahead of potential threats:

- **Master IP Address Inventory:** Gain full visibility into your network and uncover hidden or unauthorized devices.
- **Prioritized Vulnerabilities:** Get a ranked list of risks, based on severity, so you know where to focus your efforts first.
- **Personalized Remediation Plan:** Receive expert recommendations designed specifically for your network to address identified weaknesses.
- **Cybersecurity Policy Recommendations:** Strengthen your defense with tailored policy updates and improvement recommendations.
- **Incident Response Plan Guidance:** Be prepared with a clear and customizable action plan for managing cyber threats effectively.
- **Comprehensive Post-Project Report:** A full breakdown of findings, risks and best practices, all aligned with standards from FCC, APCO, DHS, NIST and NENA.

How It Works

Our strategic approach ensures every phase of the incident response lifecycle is handled effectively:

1. **Consultation:** Our team collaborates with you to understand your network, tools and mission-critical needs.
2. **Data Collection:** We deploy our agentless device to capture one week of real network traffic, ensuring accurate and extensive data collection.
3. **Deep Forensic Analysis:** Our experts apply cutting-edge methodologies to identify vulnerabilities and misconfigurations hiding within your network.
4. **Deliverables & Implementation:** We present insights, recommendations and a path forward to secure your network effectively.
