

WHAT'S NEXT WITH THE VIDA® 11 SERIES

A Future-Driven System That Lasts

Our 11 Series software upgrade for the VIDA Core improves performance, increases capabilities, extends system life and simplifies upkeep. New technologies and forward-looking design provide new features beyond voice while extending your system's lifecycle and reducing maintenance demands.

With L3Harris, your VIDA network is ready for what's next.

BUILT FOR WHAT'S NEXT: DESIGN AND CAPABILITY CHANGES TO EXPECT FOR THE VIDA 11 SERIES

EVOLVE YOUR SYSTEM WHILE STAYING CURRENT AND SECURE

Designed to last for the long term, the system bridges product generations to help you evolve incrementally as your needs change. World-class security stays current through updates that are continuously tested for compatibility before delivery, so you stay protected and up to date without disruption.

INCREASE PERFORMANCE FOR INCREASING DEMANDS

Built to keep pace as demands grow, the system supports more users and an increasing number of operations. Faster response times and more efficient workflows help teams stay productive, even across complex, large-scale and ever-changing environments.

SAVE TIME AND MONEY ON MAINTENANCE BY DESIGN

We use new technologies and methods for reliability and ease of maintenance, reducing time spent on sustainment and avoiding downtime. Through virtualization, integration that reduces points of failure and remote fault recovery technology, you can prevent failures completely or, for example, resolve them without a costly in-person visit.

GO BEYOND VOICE WITH USER-DRIVEN DATA

Go beyond voice communications with location, video and other user-sourced data that brings key information into a single common view across your users and operations. We provide seamless integration with the Android® Team Awareness Kit (ATAK) solution to make this information easy to use and shareable with others.

ACCESS YOUR DATA YOUR WAY

Access your data the way you need it with flexible interfaces that connect easily with other solutions and make your data easier to access and work with. Looking ahead, we are adding AI-enabled tools to help you capture more information, generate insights and turn your data into action more effectively.

NOW AVAILABLE FOR VIDA SYSTEMS

TWO47™ BASE STATION WITH ANALOG CONVENTIONAL

Our best-in-class trunking base station solution is now available for analog conventional systems with cost-effective site integration for overlays and the ability to software upgrade from analog to trunked with the same stations.

VIDA EDGE WITH WINDOWS 11® AND REMOTE FAULT RECOVERY

A more robust hardware option for the VIDA Edge that supports Windows 11 and includes out-of-band management technology for recovering from faults without the need for in-person visits.

TWO47 BASE STATION WITH VHF LOW AND HIGH

Our industry-leading, compact, full-power base station supports 136-150 MHz and 150-174 MHz band support for VHF systems with both trunking and analog conventional modes available.

SYMPHONY™ DISPATCH CONSOLE WITH WINDOWS 11

The same high-reliability, long-lasting design with updated internal hardware and Windows 11 support now included.

VIDA CORE WITH MICROSOFT HYPER-V® HYPERVISOR

A perpetual and cost-included hypervisor license is now available with the updated VIDA Core, enhancing performance while reducing cost.

DID YOU KNOW?

90+ Years Supporting Radio Users

From the first installed two-way radio in 1934 to the converged communications systems of today.

500+ Systems Worldwide

Hundreds of thousands of users rely on L3Harris for daily and emergency communications.

First Statewide Deployment of Two47 MCX™

Provides first responders mission-critical LTE that expands beyond voice capabilities for mission-critical operations.
