

L3HARRIS IS THE TRUSTED DISRUPTOR IN THE UNITED KINGDOM DEFENCE INDUSTRY

As the Trusted Disruptor, we deliver mission-focused solutions across all domains, supporting UK defence priorities, strengthening sovereign capability and enabling allied operations.

L3HARRIS IN THE UK

From 12 UK locations, our team of nearly 1,000 employees delivers mission-critical capabilities across space, air, land, sea and cyber for military, security and commercial customers across the UK and worldwide.

As part of the RC-135 Airseeker (Rivet Joint) programme, we deliver strategic and tactical intelligence, surveillance and reconnaissance (ISR) capabilities. We provide integrated carriage, release and interface solutions for weapons and stores on crewed and uncrewed air platforms.

In the land domain, we provide force protection systems, cyber electromagnetic activity (CEMA) capabilities including electronic warfare (EW) and encryption, CORVUS® for spectrum awareness, Drone Guardian® for counter-uncrewed aerial systems (C-UAS) and T4™/T7™ robots for remote operations in hazardous environments.

We are the proud designer, supplier and maintainer of 50,000 legacy Bowman and software-defined radios in the tactical C4I system in service with the UK Armed Forces. We are working to scale delivery of the next-generation system, Morpheus, to support the realisation of integrating survivable platforms into the network.

We deliver warship automation through control and simulation systems that are in service on Albion-class landing platform docks, and Queen Elizabeth-class aircraft carriers and Astute-class submarines. More systems are being developed and delivered for Type 26 and Type 31 frigates.

As the maritime industry's autonomy partner of choice, we are powering the Royal Navy's adoption of autonomous surface vehicle technology as well as delivering autonomous capability to UK ports, harbours and offshore energy service providers. We have delivered more than 100 autonomous surface vehicle (ASV) systems.

Our ISR sensors, communications systems and positioning, navigation and timing (PNT) solutions are at the heart of many of the most advanced space platforms, while our awareness and encryption tools ensure that we can protect and defend our most critical infrastructure in space.

Our cyber capabilities deliver information advantage across kinetic conflict, cyber warfare, force protection and counterterrorism.

OUR COMMITMENT TO SOCIAL VALUE

L3Harris is committed to fostering a safer, more sustainable future in the UK. We create a working environment where everyone has an equal opportunity to succeed and be their best selves at work.

Our Employee Resource Groups (ERGs) bring together team members to foster a culture of understanding, build relationships and promote personal and professional development. We actively back key community groups such as Combat Stress and SSAFA through sponsorships, volunteering and donations, reinforcing our Armed Forces Covenant Pledge and supporting individuals in and out of service.

L3HARRIS®
FAST. FORWARD.

ADVANCED SOLUTIONS FOR UK CUSTOMERS ACROSS EVERY DOMAIN

SPACE:

- > Space Control
- > Situational Awareness

AIR:

- > Airborne Weapons Carriage and Release Systems
- > Electro-optical/Infrared (EO/IR) Surveillance Systems
- > Signals Intelligence

LAND:

- > Tactical Communications Systems
- > Interoperable Communications Systems
- > Multi-mission Robotics
- > Signals Intelligence
- > Counter-UAS

SEA:

- > Warship Integrated Platform Management Systems
- > Multi-role Autonomous Surface Vehicles (ASVs)

CYBER:

- > Cyber Electromagnetic Activities
- > Specialist Intelligence Networks
- > Protected and Secure Communications
- > Electronic Surveillance
- > Electronic Attack
- > Through-life Management

MULTI-DOMAIN:

- > Electronic Warfare
- > Systems Integration
- > Command and Control Networks
- > Strategic and Tactical Intelligence, Surveillance and Reconnaissance (ISR)
