L3HARRIS IN RHODE ISLAND

The L3Harris team in Rhode Island is at the forefront of our mission to innovate relentlessly and deliver capability with the speed, passion and determination that our customers demand in executing their most challenging missions.

As a leader in **undersea warfare capabilities**, L3Harris equips U.S. and allied naval forces with advanced maritime sensing solutions that strengthen surveillance and improve the detection, localization and tracking of potential threats.

Since 1991, L3Harris has maintained a steadfast presence in Rhode Island, with its **Ashaway** facility serving as a trusted provider of critical undersea sensor systems and advanced military sonar technology for the U.S. Navy, including the **TB-29C** and **TB-34A towed array sonars** for submarine platforms. These systems help keep sailors safe by delivering fixed and mobile acoustic surveillance of underwater threats.

L3Harris recently expanded its Rhode Island footprint with the opening of a new 50,000-square-foot maritime production facility at ProvPort in **Providence**. Team members at the site design, produce and deliver **advanced undersea training systems** for the U.S. Navy and allied forces. This \$6 million investment strengthens naval readiness and deepens L3Harris' commitment to the state's maritime industrial base.

Cutting-edge L3Harris technologies are also utilized by some of the state's first responders to help keep themselves and their fellow Rhode Islanders safe. L3Harris' **resilient, interoperable radio systems** provide reliable communication during critical emergencies.
